INTELLIGENCE**

THE POWER OF HUMAN INTELLIGENCE

ACTION: KEY ACTION 1 MOBILITY FOR YOUTH WORKERS – MEMBER COUNTRIES

TYPE: SEMINAR

TITLE: THE POWER OF HUMAN INTELLIGENCE

CALL: KA1 ERASMUS+ FEBRUARY 2025 – SPANISH NA

WHERE: VILANOVA I LA GELTRÚ (BARCELONA, CATALONIA, SPAIN).

THE ACTIVITY VENUE IS HOTEL CÈSAR.

DATES: FROM OCTOBER 24 TO 30, 2025, INCLUDING TRAVEL DAYS.

WHY?

The activity is based on the assumption that Human Intelligence IS and WILL BE a relevant asset and capacity for the current and next generations of NGO leaders and youth workers, that we permanently need to upgrade.

3

GENERAL OBJECTIVES ARE:

- To visualize the boundaries, advantages and disadvantages of using both HI and IA in youth work.
- To reflect together and learn from each other about the areas and tasks in which HI differs from AI yet.
- To promote the use of Human Intelligence – HI, especially while using AI.

We propose these objectives in the early beginning of the AI era, in a context where it quickly changes many paradigms, including youth work, non-formal and intercultural learning, where society as a whole encourages a wider use of IA, and where information about how to use IA tools is available.

2 SPECIFIC OBJECTIVES ARE:

- To work together towards recognizing HI as a set of specific skills and attitudes (thinking skills, resilience, empathy, and problem-solving) youth workers (leaders, managers) and young people can improve through the different NGO's projects and activities.
- To come out with a collective knowledge can help us as an operational guideline to use both HI and IA in a complementary way, and to its full potential.

During the activity, we will encourage partners to give value and recognize human intelligence (HI) in youth work.

General objective 1 includes to understand the limitations and risks of using AI in youth work and reflect about the value of emotions, feelings, perceptions, and experience as privileged sources of competencies.

Specific Objective 1 includes to improve the capacities of the partner organizations to organize projects and activities valid to improve and recognize HI among NGO team members and among young people, to offer them a better support and improve their employability.

WHO?

The partnership is composed of 11 NGOs from 10 E+ member countries, to build a group of 22 individuals, 18 participants and 4 team members.

Partner organizations (and countries) are: Amaro Drom EV - Interkulturelle Jugendselbstorganisation-Von Roma. Undicht-Roma (Germany), Association for Sustainable Development SFERA International-Bitola (North Macedonia), Fundació Catalunya Voluntària (Spain), Fundacja Nomadom (Poland), Loesje Bulgaria (Bulgaria), Sistem Ve Jenerasyon Dernegi (Turkey), Solution: Solidarité et Inclusion (France), Strauss APS (Italy), Tycho Tyche (Germany), and Udruga za kreativno-održivi razvoj i konkurentnost (Croatia).

Each organization has 2 vacancies, except both German partners, with 1 vacancy each (by decision of the Spanish NA).

We expect partners to involve NGO leaders, managers, facilitators, youth workers, and trainers in the activity program's preparations and implementation.

PRACTICAL INFORMATION

A definition of Human Intelligence could be: a set of capacities related with using thinking and experience in an operational way. It includes complex thinking, understanding reality through perception, experience, and information, and problem-solving skills.

As part of the preparations, we ask each partner organization to appoint a contact person, who oversee the selection of the NGO representative/s, with whom we would like to have a brief online conversation. He/she must be available for any request for information during the whole project (including evaluation, dissemination, and follow-up activities).

Participants are requested to complete this [ONLINE REGISTRATION FORM - Seminar The Power of Human Intelligence](#) not later than the 12th of September (the sooner the better).

After that, they will be convened to participate in a brief online conversation.

The deadline to buy the international tickets is September 12th.

Participants are responsible for buying their means of transport from home to the venue in advance, and for delivering the travel tickets, documents, and invoices to get the travel reimbursement.

Participants are encouraged to share their ideas, needs, concerns, and know-how. During the activity, they will have the opportunity to share NGO's practices, tools, and experience.

The activity is selected for grants by the Spanish NA (February 2025 Call).

Thanks to the support of the Erasmus+ program, participants won't have to pay for any of the activity costs, including accommodation, food, transportation, and the program. There's no participation fee.

The international travel budget depends on the travel distance in kilometers using the E+ official distance calculator.

The travel budget for participants coming from Bulgaria, Croatia, France, Germany, Hungary, Italy, North Macedonia, and Poland is 309 € per person both ways, or 417€ if they prefer not to travel by plane but using a more ecological means of transport:

The travel budget for participants coming from Turkey is 395€.

We strongly encourage partners to be sustainable and find a green way to travel to Barcelona (Vilanova I la Geltrú).

We are here for anything we can help you with,

Kind regards,

Lluc Martí

DO WE WANT TO USE AI
WHEN PLANNING THE NEXT
EDUCATIONAL ACTIVITY?

YES, BUT I WOULD LIKE
TO KNOW MORE ABOUT
ITS LIMITATIONS FIRST

DO WE WANT TO USE AI
WHEN PLANNING THE NEXT
EDUCATIONAL ACTIVITY?

YES, BUT NOT AT THE PRICE
OF FORGETTING THAT FEELINGS,
INSTINCT AND EMOTIONS
ARE OUR EXPERTISE AS HUMANS

DO YOU WANT TO USE
AI IN THE NEXT YOUTH
PROJECT?

YES, BUT NOT IN
EXCHANGE FOR
HUMAN INTELLIGENCE
